

MangaHub: Getting Started Guide

Introduction:

Thank you for choosing MangaHub, the ultimate manga reading experience built on Flutter and powered by web scraping technology. This guide will help you understand the features of the application and provide step-by-step instructions to ensure a seamless setup and enjoyable reading journey.

Application Features:

MangaHub offers a range of features to enhance your manga reading experience:

Pagination Modes: Enjoy both horizontal and vertical pagination for comfortable reading.

Search and Discovery: Easily find manga titles, explore genres, and discover new series.

Personalization: Bookmark, mark as read, and add to favorites for a customized library.

Zoom In and Out: Dive into the artwork with zoom controls for chapters.

Detailed Information: Access manga details and chapter insights.

Tag-Based Exploration: Explore manga through tags for diverse reading options.

Responsive Design: Enjoy a consistent experience across various devices.

Cross-Platform: Compatible with both Android and iOS.

Web Scraping Technology: Access a wide range of manga titles via web scraping.

Installation and Setup:

Before running the MangaHub application, follow these steps:

Install Flutter: Ensure you have the latest Flutter setup installed on your machine. Visit the official Flutter website for installation instructions:
<https://flutter.dev/docs/get-started/install>.

Connect to the Internet: MangaHub requires an active internet connection to function properly. Make sure you're connected before launching the app.

Verify Website Accessibility: To confirm that the application's web scraping features are functional, visit the web page from which data is scraped:
<https://ww6.manganelo.tv/genre>. Ensure that tags, search, and all related functionalities work as intended.

Running the Application:

Once you've completed the installation and setup steps, follow these instructions to run MangaHub:

Clone the Repository: If you have the application's source code, clone the repository to your local machine.

Navigate to the Project: Open a terminal window and navigate to the project directory.

Run the Application: Enter the following command to run the application:
flutter run

Important Note:

Internet Connection: Ensure you have an active internet connection throughout your usage of MangaHub, as the application relies on real-time data retrieval.

Troubleshooting: If the application doesn't function as expected, visit <https://ww6.manganelo.tv/genre> in your browser to confirm the source website's availability and functionality.

Support and Feedback:

Thank you for choosing MangaHub! If you have any questions or encounter any issues, feel free to reach out to us on our profile. We're here to assist you and provide solutions. Additionally, if you enjoy using the app, we'd greatly appreciate your feedback and reviews.

Happy Reading with MangaHub!
